The QRB rupture disk provides a reverse buckling style disk in small sizes and low pressures. The QRB is ideal for applications less than 1 inch (25mm) and with lower pressure ratings. The reliable and accurate performance of the QRB has been proven in the aircraft, defense, automotive and OEM industries. Applications can be developed for low volume, starting at one unit, and upwards to high volume automated manufacturing.

Sample Applications
- Low volume, starting at one unit
- High volume, automated manufacturing
- Brass Sta-Kul
- Welded Assemblies
- Press Fit Assemblies
- Disk Cassettes

Features
- Superior high pressure cycle resistance / life
- Circular Scored Opening
- Pressure Cycle Resistant
- Disk sizes: 1/4” (6mm), 3/8” (9mm), 1/2” (12mm) and 3/4” (19mm)
- Resists full vacuum
- 90% operating ratio
- Standard burst tolerance +/- 5 %.
- Gas or liquid service capability (specify)
- Back pressure resistance always equal to burst rating; can be manipulated between 1.0 and 1.5 rating
- Standard materials: 316ss, nickel 200, Inconel® 600, Hastelloy® C and Monel®

Benefits
- Accurate and reliable burst ratings
- Superior performance in cycling service
- Withstands full vacuum
- Standard and custom holder designs are available
- Non-torque sensitive
