BS&B FlameSaf® flame arresters embody superior design characteristics and are third-party tested to the latest standards in order to provide state of the art explosion protection. Utilizing the flame arrester elements to extinguish the flame, FlameSaf flame arresters are widely used to protect tanks, piping and other systems against deflagrations and detonations. Consult your local BS&B representative or call us for consultation on your safety concerns.

**Features**
- In-line deflagration arrester / in-line detonation arrester
- Stable and unstable detonation
- Short time burning
- Available in nom. Diameter: DN25 (1") – DN80 (3")

**Protection**
- Gas/air or vapour / air-mixtures for explosion groups up to and including IIC (NEC Group B), MESG < 0.50mm
- Temperature Sensor – resistance thermometer with protection type
  - Inherently safe (EEx i)
  - Pressure Resistant Enclosure (EEx d)

**Connection Type**
- DIN 2501 PN10
- ANSI B16.5 – 150 RF
- Other types available upon request
